Website: www.sumaria.com

Formed in 1982, the company has average revenues of \$43M+ and approximately 250 employees. Sumaria provides services in support of A&AS; Engineering; Information Technology (IT); Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR); Enterprise Architecture; and INTEL to numerous Federal agencies. Sumaria supports the U.S. Air Force (AF) as its primary customer, under multiple contracts, throughout the United States and acts as prime contractor at all enterprise levels including! the AF Secretary level, Major Commands, Logistics Centers, Wings, Directorates and Groups. We have served a number of Department of Defense (DoD) organizations including United States Strategic Command (USSTRATCOM) and United States Transportation Command (USTRANSCOM) with IT, portfolio management, and A&AS support. Our total DoD experience in A&AS support to space and missile, air operations, logistics, cyber and other diverse DoD and AF missions parallels in size to the MSFC organization and mission. Sumaria has built its reputation on the delivery of high-quality services and support and uses industry-recognized best practices and processes in all program efforts. The company has worked diligently to achieve and maintain its ISO 9001:2008 (Technical and Professional Services), ISO 8000-110:2008 Master Data Quality Management and CMMI Level III certifications. Sumaria partners with key software suppliers for specific services and is currently an ORACLE/ Primavera Gold Partner and a Microsoft Silver Partner.
