Website: www.castsoftware.com

There is a major drive to increase software assurance around reliability and security of applications delivered to the U.S. Government. CAST is a pioneer and world leader in Software Analysis and Measurement, an automated approach to capture and quantify the quality, complexity and size of business & mission applications by introducing fact-based transparency into application development, sustainment and sourcing to enable program management and acquisition leaders to drive down sustainment cost & risk. CAST Federal prior performance includes: Army PEO-EIS, Air Force, SPAWAR, Military Health, Departments of: Justice, Homeland Security, Veterans Affairs, Health and Human Services and other Defense, Intelligence and Civilian organizations.
