JJR Solutions is a Service-Disabled Veteran-Owned Small Business (SDVOSB) focused on providing innovative data management and analysis solutions by understanding our client's business and the challenges they face. Founded in February of 2009, JJR Solutions has grown into a leading provider of Information Technology and Data Solutions to the Air Force with offices in Dayton, OH, Montgomery, AL, and operating locations in Washington, DC, Detroit, MI, Philadelphia, PA, Columbus, OH and Norfolk, VA. We apply our proprietary lifecycle data management process, PACE (Profile, Analyze, Condition, and Expose) to systematically evaluate, document, transform, migrate and govern our client's enterprise data sources and activities. At the heart of our process is the PACE Data Repository (PDR), a web-based metadata management platform tailored to the data management and governance needs of the client's enterprise. JJR Solutions' PACE process and associated data management technologies have been successfully implemented and adopted as best practices on major government data transformation projects that span hundreds of data sources across varied technologies. JJR Solutions is an ISO 9001:2008 (Quality Management System) and ISO 8000-110:2009 (Master Data Quality) certified organization
