Project: Keystone Decision Support System (KDSS) & Command Management System (CMS)

Objective: KDSS: Provide a working capital funds financial data warehouse so that the Air Force can forecast, analyze and manage the \$20B+ Air Force Working Capital Fund

CMS: CMS supports an AFMC balanced strategic plan and identifies additional funding, manpower, and flying hours required to ensure our continued support to the warfighter.

Scope: KDSS: Keystone is a data warehouse and data mart that provides visibility into AFWCF financial and logistics operations down to the individual level of detail, including a business intelligence tool to mine it for information

Allows analysts to better use their time for in-depth analysis of trends; quicker discovery and correction of transaction anomalies; and faster, more complete reporting of AFWCF end-of-month reporting from field-level to the Pentagon

Provides budget analysts the ability to quickly and accurately create the AFWCF budget exhibits and inputs to OSD's justification or J-Book for budget development

Project: Air Force Enterprise Configuration Management Office (AFECMO) Microsoft Consulting Services

Objective: The AFECMO mission is to ensure a worldwide standard Air Force operating environment for real-time, secure access to information to increase control, consistency, and reduce costs through enterprise configuration management. This requirement provides contractor consulting support for centralized management of products, services, assets, and standards throughout the Air Force Network (AFNet).

Scope: Acquire the necessary expertise to support the Air Force continued maintenance and optimization of standardized, secure and effective Windows-based desktop and server computing capabilities (software tools and processes), office automation and global active directory services. This effort will provide optimization of existing and future Microsoft products deployed on the NIPRNet (Nonsecure Internet Protocol Router Network)/SIPRNet (Secret Internet Protocol Router Network) used by over 600K Air Force active duty military personnel, Air National Guard personnel, Air Force Reserve personnel, Air Force civil service personnel, Air Force contractors, Federally Funded Research and Development Centers (FFRDC) personnel working on Air Force installations with Government Furnished Equipment (GFE) or at FFRDC facilities with GFE, and DOD agencies.

Acquisition Approach: TBD

Project: Air Force Directory Services (AFDS)

Objective: AFDS is an Air Force-directed initiative designed to provide a full-service Air Force identity attribute directory service. AFDS provides Air Force level identity directory infrastructure enabling secure, timely delivery of identity data attributes required by Air Force and DOD applications and organizations to enable a variety of business functions such as attribute pre-population of electronic forms and attribute-based access control decisions enhancing the information sharing needs of a net-centric Air Force. AFDS also provides synchronization of the Air Force Global Address List (GAL) and is the Authoritative Data Source for the Email for Career @ us.af.mil address for the Air Force Enterprise.

Scope: AFDS provides services to over 107 different DOD applications/organizations including AFNET, all MAJCOMS, COCOMS and Joint services.
