**Project:** Reliability Maintainability Information System (REMIS)

**Objective:** REMIS sustainment and modification contract will include all activities associated with planning, controlling, documenting, maintaining and operating REMIS, including the operation, modification and disposal of the REMIS hardware, system software, and application software.

**Scope:** The Air Force Materiel Command (AFMC), Air Force Life Cycle Management Center (AFLCMC), AFPEO Business and Enterprise Systems (AFLCMC/BI), Logistics Legacy Systems Division (AFLCMC/HIA), REMIS Program Management Office (PMO) (AFLCMC/HIAM REMIS) requires technical and operational support for REMIS sustainment which requires: multiple years of advanced expertise in HP NonStop systems including systems engineering, development, administration, operations and integration with mid-tier (Linux and Solaris) systems operating in three (3) disparate geographically separated architectural environments; advanced knowledge and understanding of Chief Financial Officer (CFO) policies, procedures and business rules for Property Plant and Equipment (PP&E) and Operating Material and Supplies (OM&S); and technical knowledge and expertise of the AF maintenance domain.

**Acquisition Approach:** One (1) year with Two (2) six month options Sole Source Firm Fixed Price (Labor), Cost Reimbursable (ODC & Travel). Followed by a separate five (5) year Full and Open competition--Firm Fixed Price. Follow-on - NETCENTS-2 Application Services contracts

**Small Business Set Aside:** TBD

**Period of Performance:** 31 Jan 14 through 31 Jan 16

**Dollar Value:** < \$50M

**NAICS Code:** 541511

**RFP Release Date:** 1 Aug 2013

**Incumbent:** Northrop Grumman Information System (NGIS)

**POC'S:**

**Project:** HIAR/HIAM Subject Matter Expert Services Support

**Objective:** To provide Subject Matter Expertise (SME) support for ten (10) Information Systems:

- Contractor Supported Weapon System Data Exchange (CSWS DE)
- Maintenance Planning and Execution (MP&E)
- Item Management Control System (IMCS)
- Requirements Management System (RMS)
- Logistics Management Data Bank (LMDB)
- Purchase Request Process System (PRPS)
- Reliability and Maintainability Information System (REMIS)
- Weapon System Management Information System (WSMIS)
- Air Force Equipment Management System (AFEMS)
- Stock Control System (SCS)

**Scope:** The SME support will be supporting the systems listed in the objectives above the Program Management Offices of AFLCMC/HIAR and HIAM.

**Acquisition Approach:** Planning to use the NETCENTS-2 Small Business Application Services vehicle. The remainder of the approach is TBD at this time.

**Small Business Set Aside:** TBD

**Period of Performance:** Apr 2014 to Mar 2017 (Base period of 1 year, and 2 one year options). The expected contract award date is Feb 2014.

**Dollar Value:** \$35M-\$45M

**NAICS Code:** 541511

### upcoming acquisitions

**Project:** Classified Equipment Requirements Computation (CERC) Data System Designer D039 Data Mining

**Objective:** This effort is to acquire an agency to complete/produce business processes and rules documentation to complete FIAR compliancy regulations for CERC a legacy application written in COBOL code and part of the AFEMS system (C001).

**Scope:** This effort is to extract essential intellectual business logic in the form of Business Rules from the D039 application, recasting them in natural or formal language, and storing them in a source rule repository for further analysis or forward engineering. The goal is to capture the D039 business rules in a way that the business can validate, control and change them over time. This effort is in support of the Program Management Office of AFLCMC/HIAR

**Acquisition Approach:** Utilizing the NETCENTS-2 Small Business Application Services vehicle. The remainder of the approach is TBD at this time.

**Small Business Set Aside:** TBD

**Period of Performance:** 2Q FY2013 for no more than 1 year. The expected contract award date is 2Q FY2013.

**Dollar Value:** \$480K

### upcoming acquisitions

**Project:** Air Force Equipment Management System (AFEMS) e-Equipment Sustainment Support

**Objective:** This effort is to acquire sustainment, maintenance and Level II Help Desk support of the e-Equipment Application.

**Scope:** The e-Equipment Application is a custom mobile inventory tracking application designed to work in conjunction with the Asset Inventory Management (AIM) component of AFEMS. AIM is used to manage Information Technology (IT) and Personal Wireless Communication System (PWCS) assets at retail and wholesale levels throughout the USAF to meet peacetime and wartime mission requirements. The e-Equipment Application will support the Hand Held Terminals (HHT) listed on the Automated Information Technology (AIT) contract (Current Contract is AIT IV) and designated by the Air Force. The current AF HHT solution for AIM includes the INTERMEC 751G, CK3 and CK31 which are considered the standard handheld to host the e-Equipment Application for use with the AIM system. The future of the e-Equipment Application may be affected by an effort underway to modernize the Air Force supply management process using an Enterprise Data Collection Layer, Automated Inventory Management Tool (AIMT). The e-Equipment Application may no longer be required after implementation of AIMT whose date has yet to be determined.

**Acquisition Approach:** Utilizing the NETCENTS-2 Small Business Application Services vehicle. The remainder of the approach is TBD at this time.

**Small Business Set Aside:** Yes

**Period of Performance:** Mar 2013 to Mar 2018 (Base period of 1 year, and 4 one year options). The expected contract award date is Mar 2014.

**Dollar Value:** \$150K

**NAICS Code:** 541511

### upcoming acquisitions

**Project:** Integrated Logistics System - Supply (ILS-S)

**Objective:** This acquisition will provide sustainment, development, and application services for ILS-S (excluding SBSS) in support of "retail" logistics systems.

**Scope:** To provide supplies and equipment support to Air Force, Air Force Reserve, and Air National Guard units at fixed operating bases and forward operating locations. ILS-S is utilized at 190 sites Air Force-wide. ILS-S is comprised of:

- Standard Base Supply System (SBSS): Legacy supply system hosted on UNISYS main-frame computers.
- Enterprise Solution-Supply (ES-S): Modernized capability hosted on the Global Combat Support System – Air Force (GCSS-AF) Integration Framework.
- Asset Management: Combines business logic in ES-S and the Enterprise Data Collection Layer (EDCL) to manage workflow for base-level wireless (bar-coded) material movement activity.
- Air Force Supply Central Database (AFSCDB): Oracle-based database for ad-hoc and standard reports processing.

**Acquisition Approach:** NETCENTS-2 Application Services Small Business Companion Contracts

**Small Business Set Aside:** Yes

**Period of Performance:** Base Year plus Three (3) - One Year Option Periods

**Dollar Value:** \$10-\$20M

**NAICS Code:** 541511

2014

upcoming acquisitions

**Project:** Stock Control System (SCS) Sustainment & Maintenance Support

**Objective:** This effort is to acquire sustainment and maintenance support for SCS.

**Scope:** The scope of this contract covers all tasks necessary to provide system sustainment, maintenance, and modification of the SCS. SCS Data System Designator (DSD) D035 is managed by AFLCMC/HIAR. SCS (D035) is a suite of systems that provide key functionality to the Air Force and other Government agencies in the area of Asset Management. SCS controls the allocation, storage, movement, and financial inventory accounting of Government-managed materiel, provides supply support to depot maintenance facilities at the Air Logistics Centers, provides asset visibility of managed items and provides optimal distribution/redistribution of stock through the leveling processes.

**Acquisition Approach:** NETCENT-2 Application Services contracts

**Small Business Set Aside:** TBD

**Period of Performance:** Apr 2014 to Apr 19 (Base period of 1 year, and 4 one year options). The expected contract award date is Mar 2014.

**Dollar Value:** Approximately \$50M-\$70M

## LOGISTICS SUSTAINMENT DIVISION

# 2014 2014

### upcoming acquisitions

**Project:** Air Force Equipment Management System (AFEMS) Operations, Maintenance, and Sustainment Support

**Objective:** This effort is to acquire operations, sustainment, and maintenance support for AFEMS.

**Scope:** All tasks necessary to provide operations, maintenance, sustainment, and security support of AFEMS, to include modifications, enhancements, and the ERP solution effort as they relate to AFEMS. AFEMS consists of the following: Unclassified Support Equipment, Classified Support Equipment, Asset Inventory Management (AIM), and Equipment Requirements System (ERS). AFEMS is a United States Air Force (USAF) automated system that is used to manage all equipment at retail and wholesale levels throughout the USAF to meet peacetime and wartime mission requirements. AFEMS provides worldwide visibility of equipment and Information Technology (IT) assets. This includes current authorizations, forecasted authorizations, in-use assets, and in-place assets. It supports equipment budget requirements, procurement plans, and capital equipment asset reporting in accordance with the Chief Financial Officer (CFO) Act of 1990. It is an on-line interactive process with worldwide user connectivity. Data processed by AFEMS includes both classified (SECRET) and sensitive unclassified equipment information. The highest classification of AFEMS data is SECRET and the classified component is designated as a National Security System (NSS). AFEMS is also impacted by the Financial Improvement and Audit Readiness (FIAR) Plan which was first issued in 2005. A DoD-wide memorandum issued by the Secretary of Defense on October 13, 2011 directed the acceleration of key elements of the FIAR Plan. Efforts began in January of 2012 to address AFEMS compliance requirements. Associated with the FIAR requirement is the Federal Information System Controls Audit Manual (FISCAM) requirement. FISCAM presents a methodology for performing information system (IS) control audits of federal and other governmental entities in accordance with professional standards. Requirements in the most current FISCAM document will require a complete and thorough review of AFEMS to ensure compliance with latest guidelines.

**Acquisition Approach:** Planning to use NETCENTS-2 Small Business Application Services vehicle

**Small Business Set Aside:** TBD

**Period of Performance:** Jun 2014 to Jun 19 (Base period of 1 year, and 4 one year options). The expected contract award date is May 2014.

**Project:** Commanders' Resource Integration System (CRIS)

**Objective:** This effort is to replace the expiring maintenance contract for CRIS. CRIS implements SAF/FM direction to "facilitate decision making within the Air Force by providing visibility into worldwide supply and financial execution on a near real-time basis." The CRIS contract provides sustainment support, which provides the requisite decision making support for CRIS users. CRIS is a read-only, multi-tier, relational data warehouse providing top to bottom level visibility across all echelons of the Air Force. The CRIS warehouse offers data from multiple legacy systems: Budget, Accounting, Supply, Fuels, Flying Hours, Civilian Pay and Personnel. The breadth and depth of data reduces the data collection effort allowing more time to be spent on decision support. Approximately 14,000 users utilize CRIS warehouse either by a business intelligence tool or web application, and execute over 8 Million queries a year with an average query response time of 5 seconds. The CRIS program's mission is to deliver reliable, accurate and timely data.

**Scope:** To provide maintenance and sustainment support for CRIS to ensure continuous system availability to over 14,000 Air Force Users. Support includes help desk services, server administration, development and integration of legacy code, interface maintenance, system and security updates and other associated activities required to keep CRIS in operational status.

**Acquisition Approach:** The acquisition approach is to use the NETCENTS II contract small business vehicle. This will be a Task Order level award. The type of contract will be firm-fixed price.

**Small Business Set Aside:** Yes

### upcoming acquisitions

**Project:** Keystone Decision Support System (KDSS) and Command Management System (CMS)

**Objective:** To provide sustainment, development, rehost and integration services for KDSS and CMS.

**Scope: KDSS Scope:** KDSS provides fund management which facilitates budgeting and execution reporting. Provide a working capital funds financial data warehouse so that the Air Force can forecast, analyze and manage the \$20B+ Air Force Working Capital Fund. Keystone is a data warehouse and data mart that provides visibility into AFWCF financial and logistics operations down to the individual level of detail, including a business intelligence tool to mine it for information. Allows analysts to better use their time for in-depth analysis of trends; quicker discovery and correction of transaction anomalies; and faster, more complete reporting of AFWCF end-of-month reporting from field-level to the Pentagon. Provides budget analysts the ability to quickly and accurately create the AFWCF budget exhibits and inputs to OSD's justification or J-Book for budget development. This contract supports AFMC, ALCs, MAJCOMS, SAF/FMBMR, each AF base, and USTRANSCOM. This contract is for maintenance, sustainment, and new development efforts.

**CMS Scope:** CMS supports an AFMC balanced strategic plan and identifies additional funding, manpower, and flying hours required to ensure our continued support to the warfighter. The CMS has over 1400 users at 5 AFMC centers geographically scattered across the United States. CMS automates the inputs of both pay and non-pay requirements and funding data, via a role-based security model. Builds Air Force Materiel Command Budget. Provides a foundation to allow AFMC HQ, panels, and centers to quickly gather resource requirements and spread the funding among products and services. This contract supports AFMC A8. This contract is for maintenance and sustainment efforts.

**Acquisition Approach:** The acquisition approach is to use the NETCENTS II contract small business vehicle. This will be a Task Order level award. Task order on NETCENTS-2 Small Business using Firm Fixed Price (FFP), Cost Plus Incentive Fee (CPIF), cost reimbursable.

**Small Business Set Aside:** Yes

**Project:** ACES FoS: ACES, IWIMS, ACES-FD, EODIMS Sustainment Support

**Objective:** Provide sustainment support for the ACES FoS

**Scope:** (a) ACES FoS (b) Help desk, sustainment, test support (c) sustainment: **ACES** - Provides base and MAJCOM Civil Engineer managers with real time data input and information output, while allowing effective resources allocation, work planning, scheduling, tracking and execution of the Civil Engineering mission. **IWIMS** - Identifies day-to-day work requirements as well as long range maintenance and repair requirements. Identifies recurring work requirements ensuring base sustainment activities are identified and completed. **ACES-FD** - Provides Firefighters the ability to facilitate efficient emergency vehicle dispatching, and a Data Management System (vehicle, equipment, manpower, etc.). **EODIMS** - Provides classified and unclassified information management tool for EOD core processes, operations, resources, flight management and incident reporting. Allows worldwide sharing of EOD operations, WMD information, responses, and enhances operational coordination among units, MAJCOMS, and Air Force. Very Important Person Protection Support Activity (VIPPSA) module is used to identify available EOD teams and schedule missions for protection of the President, Vice President, and other dignitaries

**Acquisition Approach:** NETCENTS-1 ID/IQ, FFP & CPFF

**Small Business Set Aside:** No

**Period of Performance:** 16 Jul 12 - 15 May 14

**Dollar Value:** \$7,100,000.00

**NAICS Code:** 517110

**Project:** Air Force Enterprise Configuration Management Office (AFECMO) – Microsoft Premier Services

**Objective:** The AFECMO mission is to ensure a worldwide standard Air Force operating environment for real-time, secure access to information to increase control, consistency, and reduce costs through enterprise configuration management. This requirement provides proactive and reactive services to increase operational efficiency, optimize performance, maximize uptime and reduce support cost for the Air Force Network (AFNet) enterprise.

**Scope:** Provide rapid 24x7 on-site support for reactive services of Microsoft technologies deployed at each AF installation world-wide. Additionally, provide proactive engagements via health and risk assessments periodically to preclude and reduce support incidents. This effort will provide support for Microsoft capabilities deployed on the NIPRNet (Nonsecure Internet Protocol Router Network)/SIPRNet (Secret Internet Protocol Router Network) used by over 600K Air Force active duty military personnel, Air National Guard personnel, Air Force Reserve personnel, Air Force civil service personnel, Air Force contractors, Federally Funded Research and Development Centers (FFRDC) personnel working on Air Force installations with Government Furnished Equipment (GFE) or at FFRDC facilities with GFE and DOD agencies.

**Acquisition Approach:** TBD

**Small Business Set Aside:** No

**Period of Performance:** 1 Aug 2013 – 30 Nov 16

**Dollar Value:** Approximately \$35-45M

**Project:** Air Force Configuration Management Office (AFECMO) – Microsoft Consulting Services

**Objective:** The AFECMO mission is to ensure a worldwide standard AF operating environment for real-time, secure access to information to increase control, consistency, and reduce costs through enterprise configuration management. This requirement provides contractor consulting support for centralized management of products, services, assets, and standards throughout the AF Network (AFNet) enterprise.

**Scope:** Acquire the necessary expertise to support the Air Force continued maintenance and optimization of standardized, secure and effective Windows-based desktop and server computing capabilities (software tools and processes), office automation and global active directory services. This effort will provide optimization of existing and future Microsoft products deployed on the NIPRNet (Nonsecure Internet Protocol Router Network)/SIPRNet (Secret Internet Protocol Router Network) used by over 600K Air Force active duty military personnel, Air National Guard personnel, Air Force Reserve personnel, Air Force civil service personnel, Air Force contractors, Federally Funded Research and Development Centers (FFRDC) personnel working on Air Force installations with Government Furnished Equipment (GFE) or at FFRDC facilities with GFE, and DOD agencies.
