### **BAM Technologies**

Profile - BAM Technologies is an award-winning woman- and veteran-owned small business specializing in Information Technology and services. Since 1998, BAM has collaborated with government and commercial clients to develop and deliver innovative, practical, solutions to complex problems, providing Human Capital enterprise-level solutions designed to improve business processes and workforce effectiveness.

BAM excels in delivering suites of highly-specialized, tailored solutions to meet our customers' business process requirements—solutions that fill the gap left when commercial-off-the-shelf (COTS) enterprise resource planning (ERP) solutions fall short.

Experience, technical expertise, and a workforce of functional business process subject matter experts have created a track record of demonstrated results with a proven return on investment. By providing decision-makers the right information at the right time, BAM has earned its place as a trusted and reliable partner to commercial clients and to the highest levels of government.

Core Capabilities include; Subject Matter/Highly Qualified Experts in Human Capital Management, Enterprise Services, Systems Design and Engineering, Service Oriented Architecture, Information Assurance/Security, Training and Learning, Program Management, Help Desk, SharePoint, Operations Research/Analysis

#### **Deloitte Consulting, Inc.**

Profile – As the world’s largest management consulting firm, we help organizations build value by uncovering insights that create new futures and doing the hard work to improve performance. Delivering this kind of value requires a broad range of talent and capabilities – across human capital, strategy & operations and technology – and importantly, aligned to the unique needs of specific sectors, businesses and organizations. Our clients look to us for the ability to implement the ideas we present. They expect excellent performance that draws upon our breadth of industry and service experience. Simply put, we provide our clients with world-class insights that generate tangible and measurable impact. Deloitte Consulting's Federal Practice blends public-sector experience and private-sector perspective to help agencies achieve higher levels of performance, efficiency, and innovation and make a lasting impact in the U.S. and around the world.

## VENDOR INDUSTRY DAY

### Attendees List (June 2013)

#### **Diversified Technical Services, Inc.**

Profile – Diversified Technical Services, Inc. (DTSI) is a Small Business (SB) with headquarters in Texas. DTSI has over 30 years of experience managing and performing Information Technology (IT) and Telecommunication services for government and commercial customers. DTSI's information technology services are varied and encompass a wide range of technical services including software development, web development, network support, systems engineering, help desk support and IT facilities management. Our telecommunications services range from engineering services and implementation to a host of Wireless 802.x support services. DTSI personnel employ the latest information technologies, tools and a variety of enterprise-scale platforms to deliver low-risk effective solutions. DTSI offers its customer time tested, proven and validated solutions encompassing consistent and effective performance. One current example includes development and sustainment of a refined state-of-the-art collective suite of enterprise scale systems comprising the Military Personnel Data System (MILPDS) for the United States Air Force Personnel Center (AFPC). Beginning in 1992, DTSI (as the prime contractor) was instrumental in the modernization of this enterprise-scale system used globally by the warfighter. Three decades of experience have enabled the assembly of a team with domain and technical skills that have provided effective solutions to satisfy the complex missions of military and civilian customers worldwide. DTSI has classified and unclassified environment experience and a Top Secret facility clearance. DTSI consistency and program processes have been validated via its CMMI level 3 accreditation.

## VENDOR INDUSTRY DAY

### Attendees List (June 2013)

#### **Information Systems Solutions, Inc.**

Profile – Information Systems Solutions, Inc. is an innovative Information Technology (IT) services and solutions provider to the Department of Defense (DOD) and other Federal Agencies. We provide the people, processes, design and technologies that organizations need to effectively align technology requirements with mission objectives. Our core competencies are in the areas of systems integration, systems administration, network engineering, software development, information assurance, cyber security, training, and project management. We employ skilled professionals dedicated to providing the highest quality support and services. ISS is committed to mission success, growth, and we are experienced in meeting critical goals on-time throughout the world. ISS is a Service Disabled Veteran-Owned Small Business (SDVOSB) and Woman-Owned Small Business (WOSB); this dual-hatted socio-economic positioning provides multiple avenues for enabling high-quality, dependable niche and quota fulfillment. ISS employs sound fiscal policies enabling cost competitive, effective rates to support goals, customer budgets and quality service objectives. As proof of our dedication to quality service ISS is ISO 9001:2008 certified and recommended for ISO/IEC 20000:2011 providing foundations for our client's service excellence. As a further mark of distinction, this recommendation identifies ISS as one of the first 10 SDVOSB companies to implement ISO 20000 in the United States. ISS's internal processes enable rapid response to critical customer needs such as specialized skills, deployments and procurements.

#### **Red Hat**

Profile – Red Hat, the world's leading open source and Linux provider, is headquartered in Raleigh, NC, with satellite offices worldwide. Red Hat is leading Linux and open source solutions into the mainstream by making high-quality, low cost technology accessible. Red Hat offers choices to customers building open source IT Infrastructures. We provide mission critical software and services covering Cloud, Middleware, Operating Systems, Virtualization and Storage. Red Hat's subscription services provide an environment that enables programs to be sustained over long periods of time. The cost structure remains the same over the life cycle of a program. No hidden fees for up-grades. The benefits of open source software are better price/performance, better quality, stability and robustness, faster adoptions of new technologies and operational flexibility, no vendor lock-in. By migrating from costly UNIX platform to Red Hat Enterprise Linux on workstations and servers. Customers are able to eliminate cost and ineffective systems while creating a scalable architecture to meet high-demands.

#### Scientific Research Corporation (SRC)

Profile – Scientific Research Corporation is an advanced engineering company that was founded in 1988 to provide innovative solutions to the U.S. Government, private industry, and international markets. Since its inception, SRC has continued to successfully meet emerging challenges in the marketplace and consistently deliver the highest quality products and technical services to its customers. SRC's business activities are focused on a broad range of information, communications, intelligence, electronic warfare, simulation, training, and instrumentation systems. With corporate headquarters in Atlanta, Georgia, and engineering offices located across the U.S., SRC is dedicated to a full range of engineering, integration, testing, support, and research and development activities. SRC laboratories and test facilities reflect state-of-the-art technology and mirror both commercial and defense operational environments. The company has expert resources and facilities in place to provide its customers: Products and services related to complex electronic systems; •Custom hardware/software development; and •Engineering services that span analysis, design, and development through integration, installation, and support. At the core of SRC's capabilities is a seasoned team of highly skilled engineers and scientists with multi-disciplinary backgrounds. This team of professionals is challenged on a daily basis to provide leading edge technology solutions to our customers. Their knowledge and expertise in rapidly and proficiently matching advances in technology to customer needs and applications is the basis for SRC's success. Today's climate of competition, fast-paced technological change, and complex global conditions demands the delivery of products and services that meet an ever increasing standard of quality at minimal cost. The breadth of our skills and service offerings and the depth of our knowledge give SRC a balance and diversity that will enable us to successfully meet these demands – through advanced technology solutions tailored to our customers' needs.
