Axios Technology – Simplifying your technology, and your business; Wade Kirkham founded Kirkham Technology Solutions (now Axios Information Technologies, LLC) in January of 2002, after discovering his true calling to use technology in order to help small and medium-sized businesses grow and succeed. He now oversees all of our business operations and serves as both our President and an IT consultant. Wade brings 20 years of technology industry experience to Axios IT, having previously worked in technical and consulting roles.

Wade is recognized as an expert in his field and has helped hundreds of companies realize their goals through the use of strategic technology, from small businesses to Fortune 500 companies. His ongoing mission is to provide our clients with products and services that exceed their expectations, by earning their trust through kept promises, honesty and integrity. Wade was born and raised in the Nashville area and enjoys spending time with family and friends, traveling, playing tennis & golf, and riding bikes with his kids.

Wade's years of experience with implementing, managing and securing network infrastructures has allowed Axios to provide the best possible IT solutions for clients looking to reduce their overall IT Costs while maintaining a stable, high performance IT Infrastructure.

eSolutions Architects (ESA), Inc. – Welcome to eSolution Architects, Inc. a privately held, minority- and veteran-owned company founded in 2005 and headquartered in Montgomery, Alabama. eSA is a U.S. Small Business Administration 8(a) Business Development Program company and Small Disadvantaged Business certified since January 2009. Our company strives to deliver the products, services, and solutions to our clients across diverse business disciplines, accelerating the “time to value” of all technology investments. We also specialize in high-value services, focused primarily on server virtualization and consolidation and IT product installation, management, and support. eSA is a company founded on the principle of providing our clients with the best-possible technologies intended to provide tangible benefits to business practices and cost efficiencies.

In the ever-changing landscape of the technology industry, highly engineered, broadly focused products no longer control the market. Customers are now demanding low-cost solutions that can evolve after the initial sale to meet future anticipated and unanticipated functional needs. Additionally, strong competition resulting from shorter product life cycles and new business models is driving companies to utilize technology to discover and eliminate operational inefficiencies. eSolution Architects understands the changing technology industry and that customers can no longer rely on generic products and services designed to meet a broad spectrum of needs. eSolution Architects is dedicated to delivering solutions that are tailored to the specific challenges our clients face by providing technical expertise grounded in pragmatic realities and requirements, helping their businesses run in the most practical, efficient manner possible. To meet our clients' needs, eSA consultants have over 100 years of experience in the technology industry, including application development, systems integration, project management, and services and support. Our company is staffed with seasoned veterans--trained and skilled in the products our company supplies, integrates, and supports. eSA is committed to delivering innovation--collaborating with our clients, assisting them in leveraging high-tech solutions developed with an insight to customer-specific business needs, allowing for increased efficiency, reduced costs, and greater revenue generation.

Excellus Solutions – Excellus Solutions, LLC is a Joint Venture comprised of long-term partners, 22nd Century Technologies, Inc. (TSCTI) and Optimal Solutions & Technologies, Inc. (OST). We are dedicated to providing our customers with quality IT services through process-driven best practices, including CMMI Level 5, ISO 9001:2008 and ANSI 748 Earned Value Management (EVM) processes and procedures.

The relationship between TSCTI and OST spans over a decade and across multiple projects. Our alliance has evolved from a mentor-protégé relationship, to a prime-subcontractor partnership, and presently, a Joint Venture.

A Prime on the NETCENTS-2 effort, Excellus Solutions built its team for quality, performance and success. With experience supporting the U.S. Air Force on contracts totaling more than \$4.7B, our team members have the expertise to fulfill all NETCENTS-2 task orders with proven quality. As incumbents on the NETCENTS-2 initiative, we support the Air Force mission while providing non-disruptive transition, lower risk and higher performance. We bring the skills and precision to meet the NETCENTS-2 goals: efficient in peace, effective in war, and ensuring success across the spectrum of operations.

VENDOR INDUSTRY DAY

Attendees List (November 2013)

Juniper Networks – At Juniper Networks, we believe the network is the single greatest vehicle for knowledge, understanding, and human advancement that the world has ever known. Now more than ever, the world relies on high-performance networks. And now more than ever, the world needs network innovation to unleash our full potential. The network plays a central role in addressing the critical challenges we face as a global community. Consider the healthcare industry, where the network is the foundation for new models of mobile affordable care for underserved communities. Or the energy sector, where the network is helping to accelerate distribution of clean, renewable sources of energy. In education, the network continues to expand access to quality teaching resources, so that people of every socioeconomic background have a chance to educate themselves and participate in the global economy. At its core, the network has become a platform—one that transforms how we interact with our government institutions, conduct business on a daily basis, and connect with our family and friends.

Every day, Juniper Networks is helping our customers build the best networks on the planet. Every innovation we envision, every technology we create is informed by our desire to help solve our customers' toughest challenges so they can compete and thrive today and into the future.

MILVETS – Since it’s founding in 1986, MILVETS Systems Technology, Inc. (MILVETS) has been a reliable provider of quality services in the information and technology fields. As a Service-Disabled Veteran-Owned Small Business (SDVOSB), certified by the Small Business Administration (SBA) as a Small Disadvantaged Business (SDB), the company was founded to offer efficient, cost-effective information technology services to commercial and government clients. The corporate vision is realized through the development of a strong commitment to long-term client satisfaction and corporate expansion. Successful application of good business principles and management techniques has been fundamental to the company's growth, integrity and financial stability.

VENDOR INDUSTRY DAY
Attendees List (November 2013)

Our mission is to be at the forefront of technology and innovation, delivering superior capability in tandem with maximized cost efficiencies. The security solutions we provide help secure freedoms for our nation as well as those of our allies. Squarely meeting our obligations, fiscally and technologically, isn't just a business goal, but a moral imperative. To that end, as we evolve as a company, the responsibility we feel for our country and the citizens and troops we help support grows with us.

SI Systems Technologies (SIST), LLC – SIST is a joint venture between Stanfield Systems Inc. and Infinite Technologies Inc. Both companies realized synergies in regards to dedication, commitment, and value. In today's Defense Contractor industry, too many news stories arise reporting fraud, waste, and abuse by contractors concerned with bottom line as opposed to delivering quality products/solutions at a fair price. Leadership from both Stanfield Systems and Infinite Technologies agree that such policies are unacceptable and out of the question relative to our business practices. By joining forces, SSI and ITI, form a complete solution with qualities that rival larger entities and corporations without sacrificing overhead costs. Being lean, able to leverage the right skills at the right time are the cornerstone of SI Systems Technologies existence.

We are owned and managed by an experienced and knowledgeable team of Air Force and Army Veterans, as well as former DO Civil Servants and experts from Industry with tenured expertise. Experienced Personnel in Performing Classified and Non Classified Contracts: In-House FSO

Up and Running (UAR), Inc. – Up and Running was founded in 1999 by president and CEO, Josh Bush. Bush formed the company to fill a void he saw in the market: access to highly-skilled technology, infrastructure, and project management services. Based in Montgomery, Ala., Up and Running focuses on customer-oriented enterprise solutions that utilize state-of-the-art technologies and are based on the most modern methodologies. Up and Running evaluates each client's specific requirements and business objectives so we are able to recommend the most appropriate, state-of-the-art technologies. Our approach combines the solutions that best support your existing systems with our expert services and sustainment.

Vormetric - Not so long ago, it was much easier to protect your data. Perimeter defenses were in place and there were only so many ways in. Data came in from IT-approved, enterprise-controlled devices and applications. It lived on your servers and storage arrays. It was protected by walling off the outsiders and trusting your insiders.

But things have changed in a big way. Now, more data than ever is collected from more applications, users, devices, and connected hardware, with dwindling amounts of it under enterprise control. New forms of doing business demand easy access from the outside. With the emergence of the cloud, your data may not even be on the inside anymore. And “insiders” with access to your data increasingly include third parties who don’t work for your organization at all.
